

Schedule a Tire-Pavement Noise 101 Workshop in Your State

Want an FHWA workshop on tire-pavement noise? Read on.

"Agencies nationwide want to reduce highway noise. This workshop teaches pavement practitioners the complexities of the noise issue, while also teaching the highway noise community about the complexities of pavement issues."

- Mark Swanlund, Senior Pavement Engineer, FHWA

About the Workshop:

This FHWA-sponsored workshop is your opportunity to bring noise and pavement experts together in order to help them understand each others' concerns, see possibilities for integrating pavements into noise mitigation issues, and realize the need to work together to seek out solutions. This complex topic is presented in a simple and entertaining manner by world-renowned industry experts Robert J. Bernhard, Ph.D., P.E. (IN) and Robert Otto Rasmussen, Ph.D., P.E. (TX).

Workshop Objectives:

- To educate noise practitioners on the fundamentals of pavements.
- To educate pavement practitioners on the fundamentals of noise.
- To understand tire-pavement noise and how it fits into the bigger picture.
- To understand the fundamentals of measuring and interpreting noise.
- To examine current practices for designing and constructing quieter pavements.

To Reserve Your Free Workshop:

Limited slots are still available and are scheduled on a first-come, first-served basis. To schedule a free workshop in your state, please contact:
