International Intelligent
Construction Technologies Group

April 2019

The International Society for Intelligent Construction (ISIC) is a **source for knowledge and information on intelligent construction technologies for public agencies, contractors, consultants, academia, and other relevant industries.**

Objectives

- Exchange ideas and information in an informal setting,
- Provide a forum for the practitioners of ICT from agencies, contractors, academic, vendors, and consultants,
- Provide a forum for discussion of research and development,
- Focus on the latest initiatives in the Society's areas of interest,
- Provide education and training in the areas of concentration,
- Provide technical assistance and reviews on regional and international standards and specifications,
- Provide an ICT journal to promote advancements on science and technologies of ICT, and
- Create and maintain a network of personal and professional relationships.

Intelligent Construction Technologies (ICT)

All Modes of Transportation Infrastructure

ISIC Committees

- Executive Committee (4)
- Steering Committee (12)
- Technical Committee (29/40)

ISIC Structure

Executive/Steering Committees

Provide visions and directions.

Technical Committee

Provide technical expertise.

Chapters

Extend to local regions.

Subcommittees

Handle specific administrative, educational and technical functions.

ISIC Executive Committee

ISIC Steering Committee

ISIC Technical committee

ISIC Technical committee

Task Groups Under ISIC Secretariat

- Task Group A – Administration and Finance
- Task Group B – Meeting Programs
- Task Group C – Sponsorship and Industry Participation
- Task Group D – Communication
- Task Group E – Membership process and approval
- Task Group F – ISIC Journal and other publication

ISIC Subcommittees

SC1 Perception and Control

SC2 Data Analysis and Management

SC3 Artificial Intelligence (AI) and Engineering

SC4 Integration and Innovation

SC5 Green and Safety

SC6 Education and Training

SC1 Perception and Control

All technologies related to data acquisition and controls, including

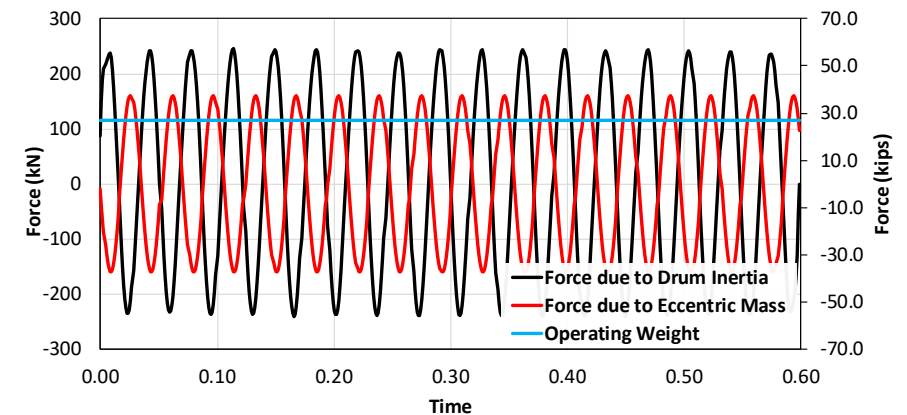

- sensing technologies,
- data collection technologies (e.g., GNNS, LiDAR , Unmanned Aerial Systems (UAS)),
- Internet,
- monitoring technologies (e.g., materials, paving, and intelligent compaction),
- Automated Machine Control (AMC),
- Automated Machine Guidance (AMG), and
- Autonomous Control Machinery (ACM), etc.

SC2 Data Analysis and Management

All technologies related to data analysis and management, including:

- data science (e.g., Big Data, data communication protocols and standards),
- signal analysis,
- Cloud computing, and
- digital information platforms, etc.

SC3 Artificial Intelligence (AI) and Engineering

Application of AI on construction, including:
intelligent algorithms, computing and methodologies (e.g.,

- engineering expert systems,
- neural network,
- machine learning, etc.)

SC4 Integration and Innovation

Application with fundamental theories and integrated technologies during design, construction, and rehabilitation/maintenance stages, e.g.,

- stress analysis,
- augmented reality technologies (BIM, VR/AR, 3D visualization),
- interaction between construction machinery and constructed media,
- risks forecast/evaluation,
- management and decision-making, etc.

SC5 Green and Safety

- Conservation of natural resources, environmentally friendly technologies.
- Application of automated sensing/safety technologies on construction and operation, and
- forewarns of all kinds of disasters and recovery, etc.

SC6 Education and Training

Promote globally intelligent technologies. including textbooks, technical training and so on.

- Free and Open to Public
- Privilege to access member-only contents
- Apply on [IS-IC.org](https://www.is-ic.org)

ISIC Membership

Central-South America/Africa

PAN Pacific/Australia

ISIC Journal - ICT for Infrastructure

A Book Series - ICT for Transportation Infrastructures

7 Books in English (Springer) and Chinese (CRPC) in 2021

1. Introduction to Intelligent Construction Technology of Transportation Infrastructure
2. The Basis of Perception Terminals: Information Technology in Engineering
3. The Basis of Perception Methods: One-dimensional Dynamics and Applications in Engineering
4. The Basis of Machine Analysis and Decision-Making: Into Machine Learning
5. A Weapon for Engineering Quality: Perception and Data
6. Executive Assistant: Control Technology in Engineering
7. Pioneer of Intelligent Construction: Intelligent Compaction

ISIC

ISIC 2022 – Theme and Topics

Trends on Construction in the Post-Digital Era

- Additive Manufacturing and Construction
- Artificial Intelligence (AI) for Design and Built Environment
- Advanced and Edge computing
- Building Information Modelling (BIM)
- City Information Modeling (CIM) and Geographical Information Systems (GIS)
- Collaborative and Participative Design
- Construction Automation and Robotics
- Cyber-Physical Systems
- Data Science and Standards
- Design Concepts and Strategies
- Digital Fabrication Development and Implementation
- Environmental Protection
- Form Finding, Topology and Structural Morphology
- High Precision Survey and Mapping
- Improved Energy Efficient Building Operations
- Infrastructure Life-Cycle Management
- Intelligent Building Control Systems
- Intelligent Construction Sites
- Intelligent Maintenance Technologies
- Internet of Things (IoT) in Architecture and Construction
- Intelligent and Sustainable Environments
- Machine Automation
- Real-Time Construction Monitoring
- Smart Cities
- Simulation, Prediction and Evaluation
- Emerging Technologies

ISIC 2022

Trends on Construction in the Post-Digital Era

7-9 September 2022

Guimarães, Portugal

A MUST-ATTEND CONFERENCE
FOR INTELLIGENT CONSTRUCTION

www.IS-IC.org

SAVE THE DATE

EU Chapter

North America Chapter

ISIC North America Chapter Plan

- Regular officers web meetings
- Support NRRRA/FHWA on ICT Data QA (IC, PMTP, DPM, eTicketing/MDMS)
- Membership Drive
- ISIC NA Chapter Mini-Conference (in fall 2021?)

ICT Data QA

IC Pass Count Data QA with GPS Trackers

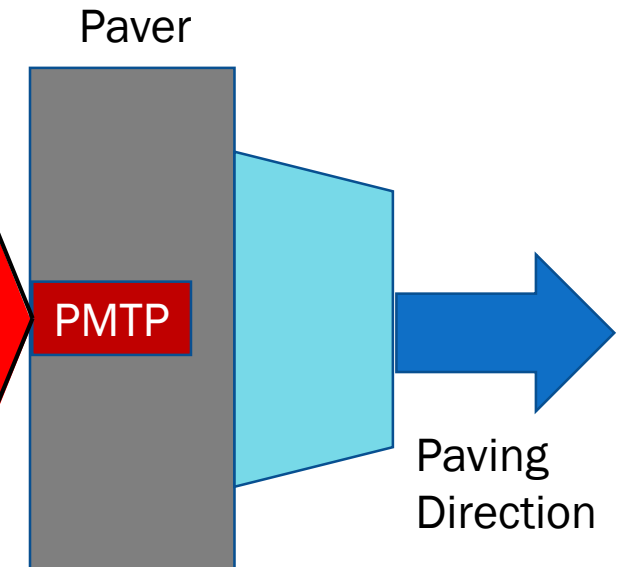

PMTP Data QA with Thermal Camera

Field Photo

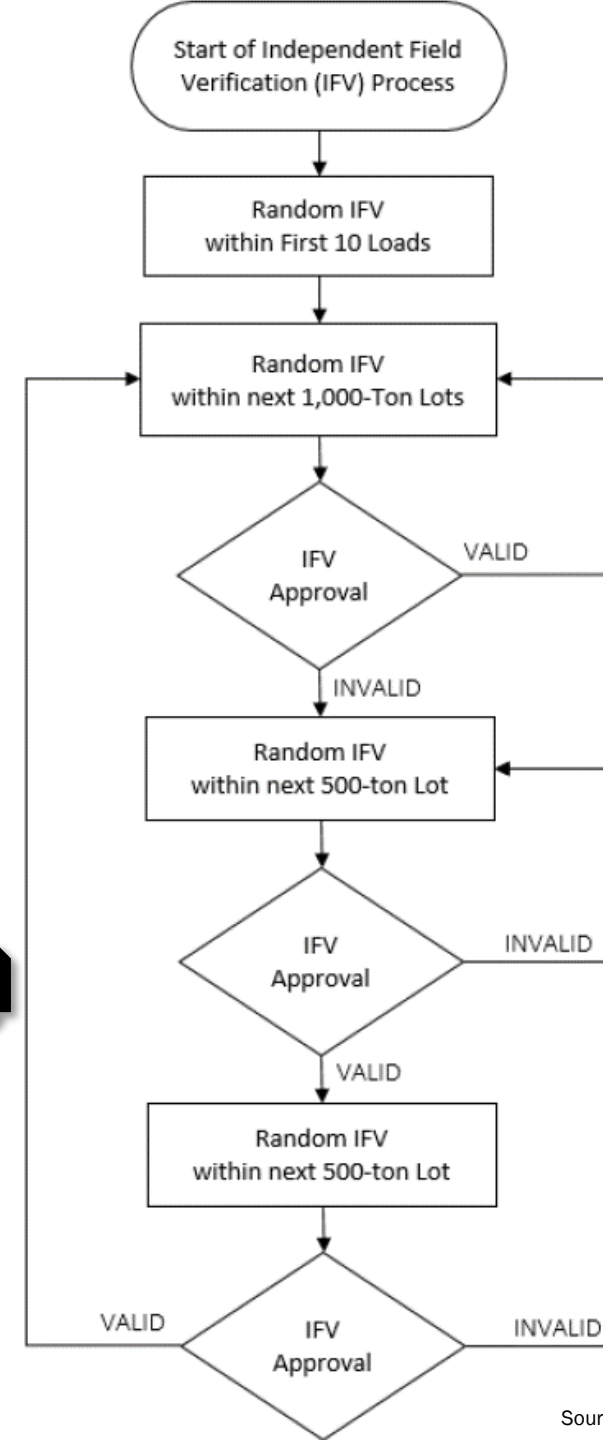

Thermal Image

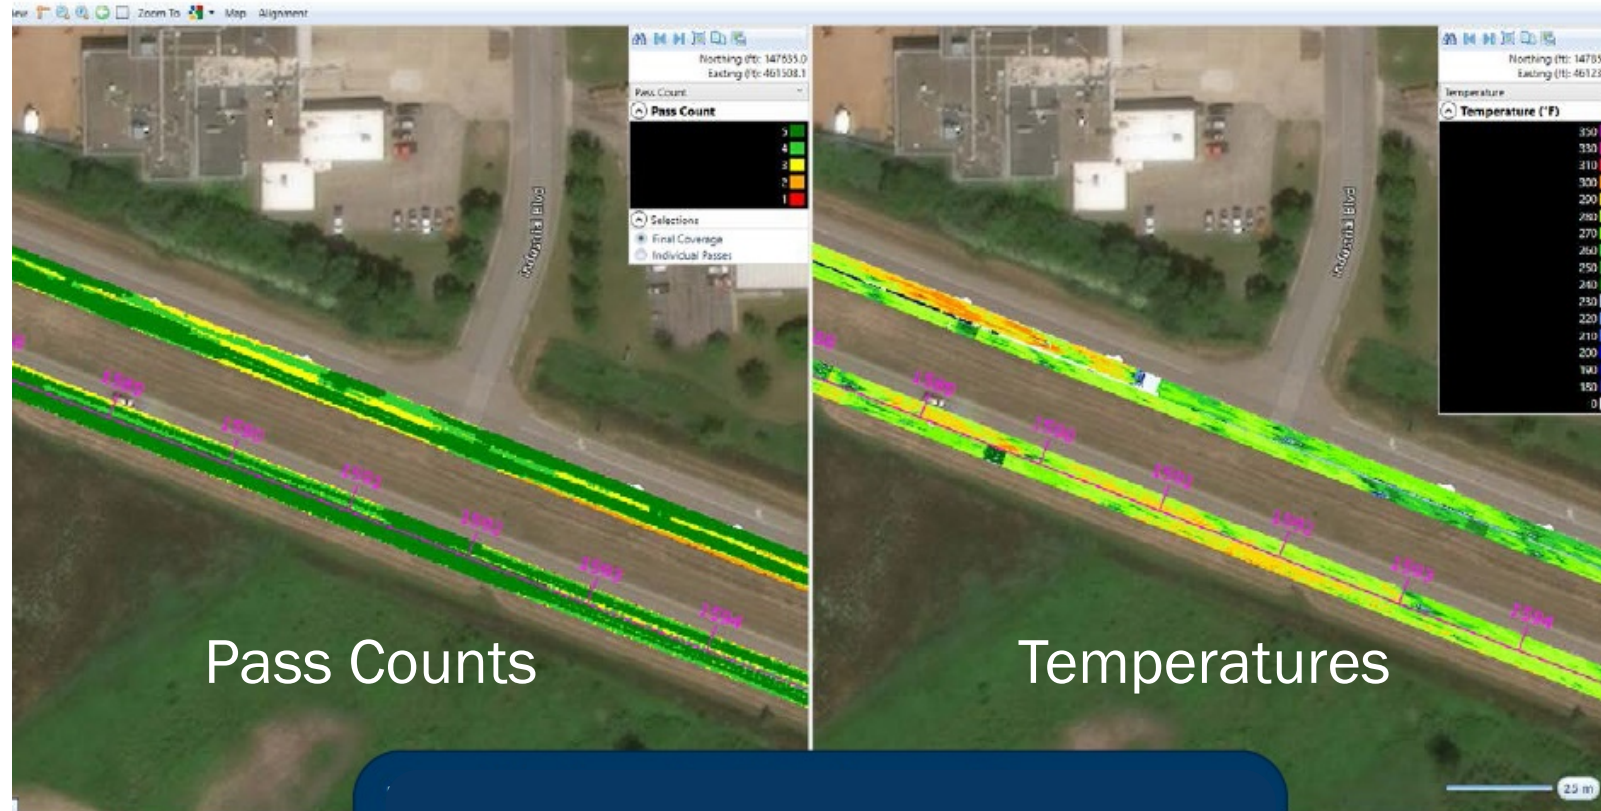

MDMS Data QA

Independent Field Verification (IFV)

DPM Data QA

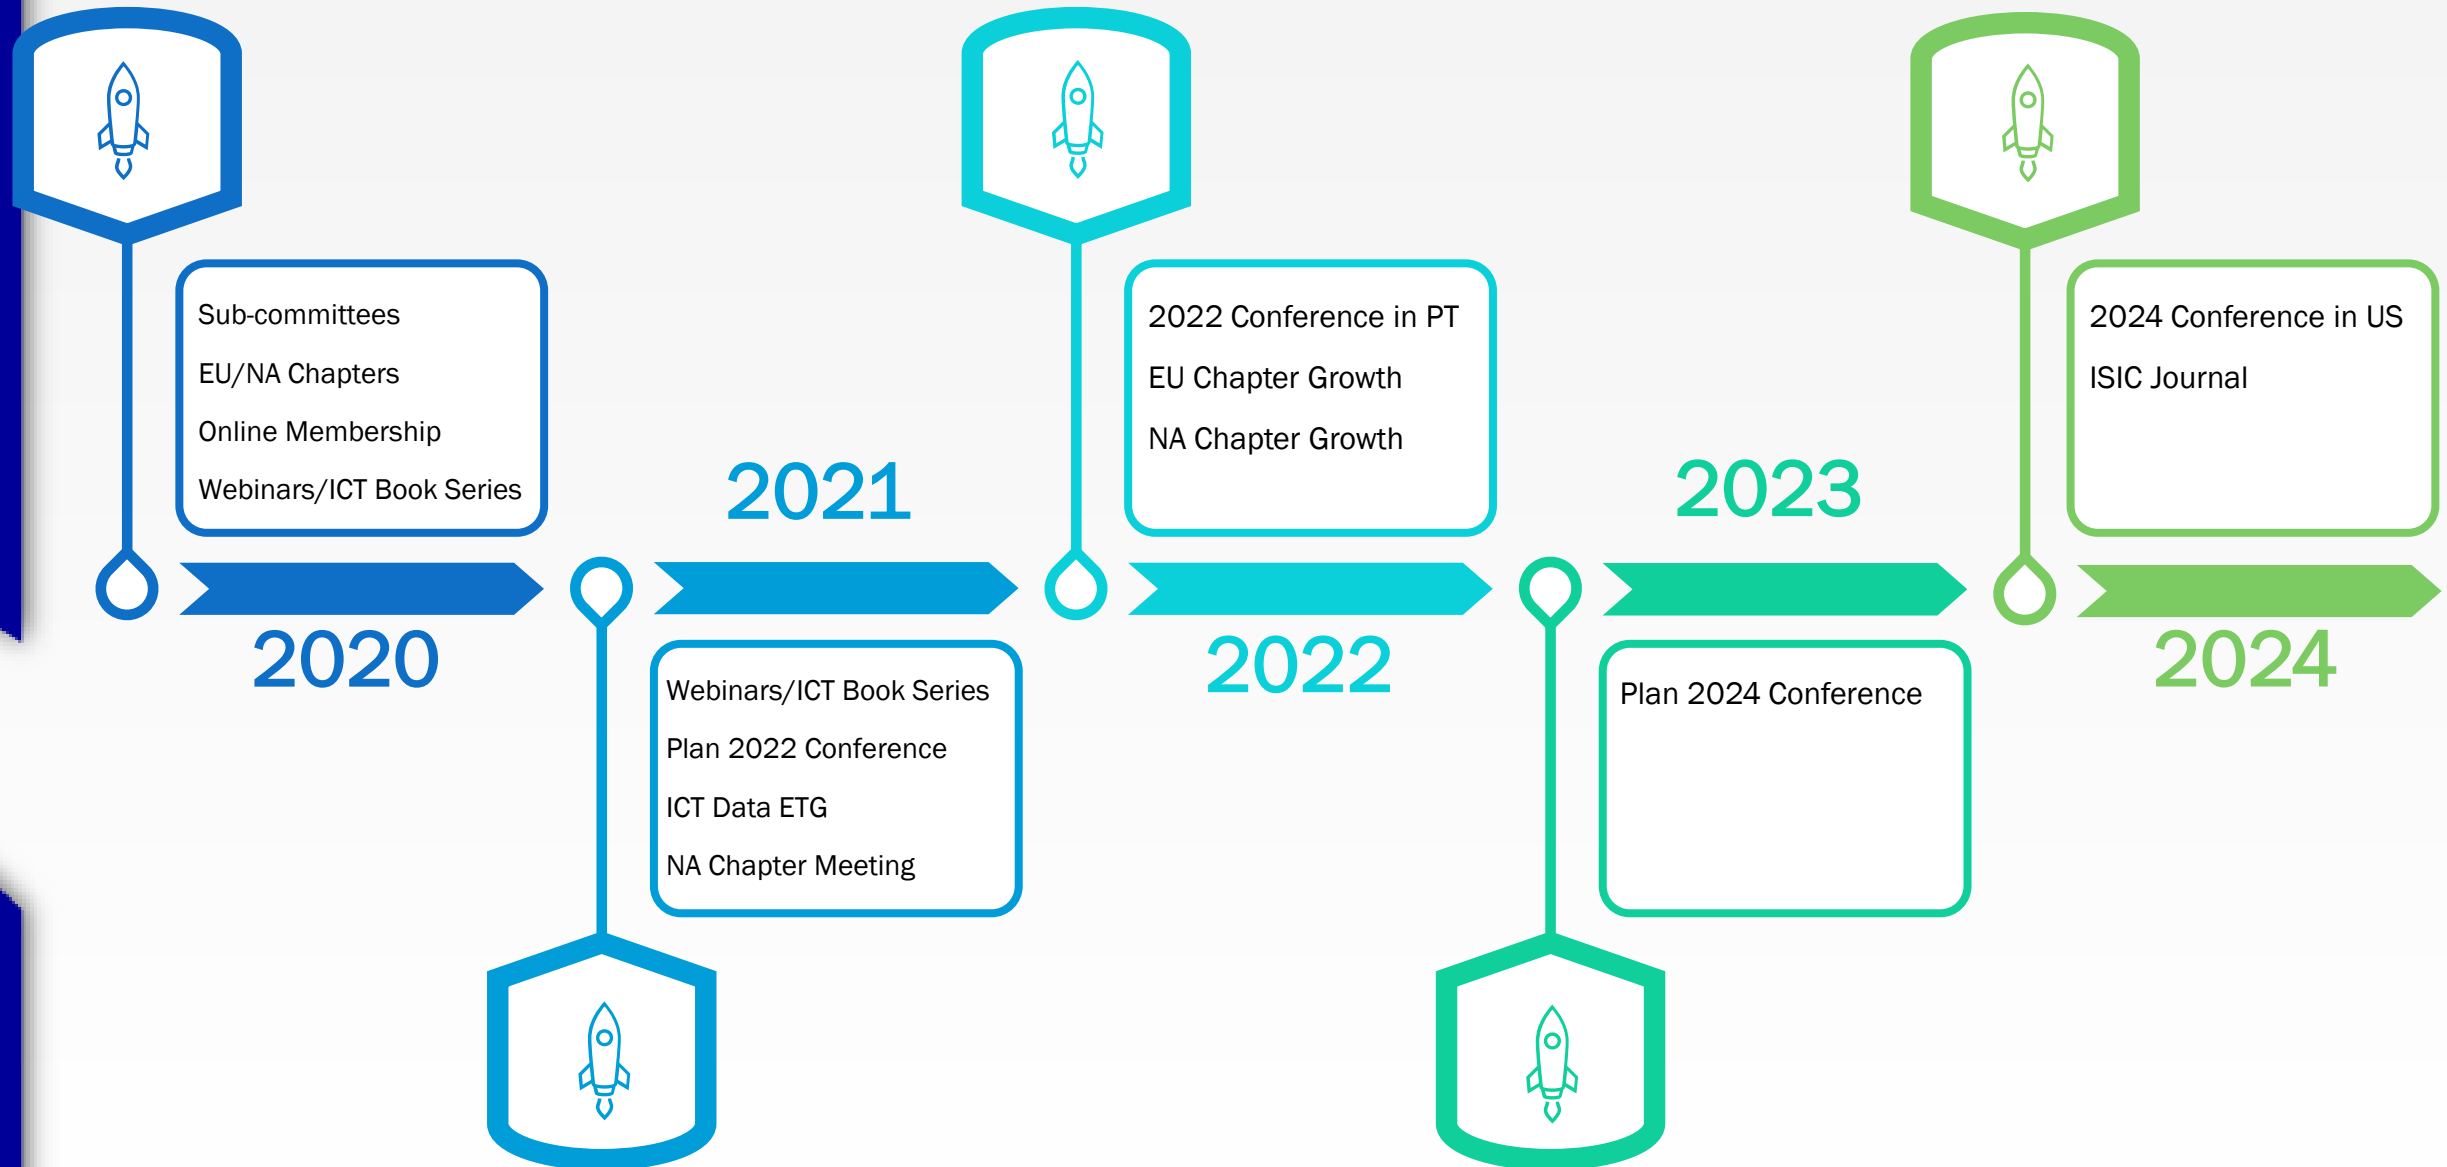

Verification of Calibration Curves - DPM

Future Growth & Development

- Growth Plan for ISIC
- Subcommittees in Specialized Fields
- Local Chapters
- ICT Standards
- ICT Journal
- Workshops/Webinars

ISIC 5-Year Plan Goals

ISIC 2021 Calendar
